

Information Sheet No. TFD-2018-15

SOLID TIMBER DOORS

General Description

Tasmanian Fire Doors manufacture a large range of solid timber doors made from select solid hardwood, to suit the broad variety of our customers' requirements. Door dimensions can be manufactured to meet your specifications.

Applications

Tasmanian Fire Doors can provide solid timber doors to suit a wide range of applications, from swinging/ sliding / double acting /bi-fold configurations. An extensive range of glass can be factory installed using square or splay glazing beads.

Additional preparations to your door that are available include prep to suit any hardware required, e.g. lock preparation, recessing for concealed door closers, and acoustic seals.

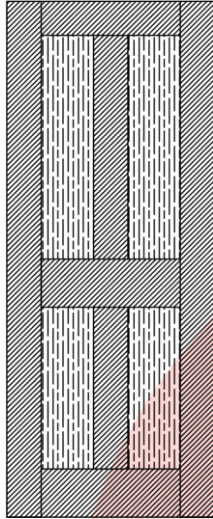

See below for a sample of available designs or [contact Tasmanian Fire Doors](#) today to discuss your custom design
