

Information Sheet No. TFD-2018-22

AIR GRILLES

Intumescent Air Grille

General Description

Especially designed to provide fire protection of air relief penetrations in fire doors, the intumescent material softens at high temperatures to completely seal the penetration and maintain the fire resistance level of the door.

Applications

Can be fitted to penetrations through all types of fire rated doors with FRL up to -/180/30.

General Features

- Maintains the Fire Resistance level of any fire rated door with an FRL up to -/180/30
- Easy installation
- Galvanised cover plates to each face of door
- Helps to reduce door closing pressure on enclosed rooms.

Non Fire Rated Air Grille

General Description

Designed to provide air flow to assist in temperature control and ventilation.

Applications

Can be fitted to penetrations through non fire rated doors.

General Features

- Easy installation
- Readily available in a range of sizes and finishes
